Fits Custom 98, A-5
Available Soon for Spyder,
Piranha

BT

BT SEALED BOLT SYSTEM

It seals your bolt to keep dirt out and noise in. Made of high impact plastic, this piece is extremely durable and lightweight. This system replaces your stock bolt handle with a shorter handle, which is pulled back by a slide inside the outer cover. The gun is then cocked by pulling back on the ring shaped handle. During firing, the handle can be pushed forward. It is not connected directly to the bolt handle, so it doesn't move back and forth on every shot.

Fits Custom 98

BT 3-PIECE VERTICAL BOTTLE ADPT.

Fits Custom 98

Easy To Put Together
