

## WDP MULTI TOOL KIT

(Angel) LPR - Black

(Angel) Ram - Black

(Angel) Ram - Chrome

## WDP CUSTOM BOLT

The Custom Bolt from WDP is heavier than the standard design, offering higher impact properties on the valve, and thus allowing the user to reduce the guns operating pressure, decreasing the chance of ball breakage and offering a quieter sound signature. The graduated porting on the bolt face offers an even spread of gas to the ball, further decreasing ball breakage and reducing ball spin.

## ANGEL TRIGGER

The custom trigger range designed for the Angel utilizes both a high U.T.S (ultimate tensile strength) alloy that surpasses any aluminium alloy used to date and a low S.G. value (specific gravity), giving a very light weight trigger. All this results in a trigger that is designed to be fast acting with a high tactile feel with inbuilt comfort.

## LCD DOUBLE TRIGGER

Angel - Fits LCD Version Only

## WDP SCULPTURED FEEDPORT

The Sculptured Hi-Rise feed allows 5-ball stack, ensuring a fast feed-rate into your Angel whilst minimizing the chance of chopping paint. Ideal for back players or players who like a fast ride. This Hi-rise is engineered to fit any Angel from the earliest LED to the latest 2002 shape. The spiral milling adds a little flavour to the proceedings and mirrors other accessories in the WDP range.
