Warp Feed Module C&C - Vertical/Black

E-MAG

The E-Mag is trigger actuated by magnets for quick and fast shooting. There is also a dual selector option which lets you change from electric or manual operation. It operates with 18 volt rechargeable batteries or 2 x 9 volt batteries. The powerfeed model is designed to work with the Warped Feed loader system.

R/T MAG **PRO**

The RT Pro is equipped with the ReTro Valve, Airgun's patented reactive-trigger firing system, so you'll experience ultra-fast recharging and no shoot down. You'll angle right or snap shoot left with equal ease, and have opponents heading for the dead zone before they know what hit 'em.
