

PRODUCT RECALL NOTICE

DATE: September 10, 2004

TO: Carlos Rojas
General Manager
Scott High Pressure Technology

There may be potential defects in the 16 oz. Chrome-Moly paintball cylinders manufactured by Sharpville Container Corporation, which are supplied to Scott High Pressure Technology and distributed by National Paintball Supply, Inc., and sold under the trademark **FUEL**. A failure of the paintball cylinder from these defects, if present, could result in personal injury or property damage.

The lot in question numbers only 29 cylinders, and a number of the cylinders have already been secured. The Product Lot Number involved is # 040992, manufactured by Sharpville in early April 2004. The lot number is the last 6 digits roll marked on the outside wall of the cylinder.

Sharpville Container will replace on behalf of National Paintball Supply, Inc. the above-referenced products free of charge, freight pre-paid by Sharpville.

If you have sold any of the above products, it is essential that you contact the purchasers, keep a record of each purchaser contacted, the results of each contact and the return of the affected product.

If there are any questions or you require assistance, please call Laura Schneider at (724) 962-1100, extension 110. A service representative will be calling you to follow up on this notice.

For assistance in this matter or in order to obtain the replacement credit, either:

1. Contact your designated National Paintball Supply, Inc. sales representative or
2. Call Sharpville Container Customer Service at (724) 962-1100, extension 110.

As this matter represents the potential for personal injury or property damage, we must impose on you to contact your customers as soon as possible, and we apologize for the inconvenience to you. Please be assured that Sharpville Container Corporation has taken steps to eliminate this concern in the future.

John Tuleibitz
